EDUCATION

United Institute of Technology - Coimbatore *September 2022 - Present*

Bachelor of Engineering, Computer Science & Engineering

- **GPA**: 8.5
- **Relevant Coursework**: Python & C Programming, Foundation of Data Science, Data Structures, Object Oriented Programming, AI/ML, Database Management Systems, Algorithms, iOS, Computer Networks, Web Application Security, Software Testing, App Development.

EXPERIENCE

Oasis Infobyte — *Web Development Intern* (Remote) *May 2025 – June2025*

- Built responsive web interfaces using HTML, CSS, JavaScript, and React.
- Developed and structured client-side modules with a focus on performance and user experience.
- Deployed the project using **GitHub Pages**, ensuring smooth hosting and version control.

Bluestock Fin Tech — *Software Development Engineer Intern* (Olathe, KS) *March – April 2025*

- Assisted in backend development for financial transaction processing and risk analysis tools.
- Integrated APIs and secure payment gateways using **Java** and **SQL**.
- Improved system efficiency by optimizing code, reducing processing time by **15%**.

NoviTech PVT. LTD. — *AI/ML & Data Analys* (Virtual) *December 2024 - February 2025*

- Worked with data scientists to build and deploy machine learning models for classification and prediction.
- Gained experience in supervised learning, data preprocessing, and model evaluation.
- Used Python tools like **scikit-learn**, **pandas**, and **NumPy** for data handling and model development.

Tareeqa Global Solution PVT. LTD. — *HR Trainee* (Virtual) *August 2024*

- Completed training in **HR Analytics**, **Advanced MS Excel**, **Talent Acquisition**, and **Recruitment processes**.
- Gained practical experience in applicant tracking, candidate screening, and data-driven HR decision-making.
- Received a **Letter of Recommendation** and **Certification** for excellent performance during the program.

SKILLS

Python | Java | SQL | HTML | CSS | Java Script | CI/CD | Railway | GitHub | Render | Windows 11

PROJECTS

Global News Website (Real-Time News Aggregator) *August 2025*

- Created a responsive web portal using **ReactJS, Bootstrap, and NewsAPI** to deliver live global headlines.
- Implemented advanced features including **news categories** like Sports, Entertainment, Politics, Business, Health, Science, and General News.

Job Portal. (Career Connect Platform) *July 2025*

- Developed a job board system using **HTML, CSS, JavaScript, Node.js, and MongoDB**, enabling recruiters to post jobs and candidates to apply seamlessly.
- Implemented secure authentication and efficient job search filters to improve user experience.

Mini Web Projects (landing pages, personal portfolio, small business sites) *June 2025*

AI News Reporter (Intelligent News Summarizer) *February 2025*

- Built an AI-powered news reporting tool using **Python, Flask, and OpenAI APIs**, capable of summarizing global headlines in real time.

TECHNICAL TRAINING

Cybersecurity Fundamentals Workshop — *YaleitSkillHub* *June 2025*

Android App Development (15-hour Workshop) — *Udemy* *January 2024*

Hardware and Mobile Software Integration Workshop — *UIT, Coimbatore.* *2023*

CERTIFICATIONS

Code in JAVA — Udemy (In Progress) *July 2025-Present*

Cybersecurity Analyst — IAM Analysis – Tata Consultancy Services *February 2025*

Data Engineering & Big Data Technologies— GUVI *August 2021*

- Completed certified training programs to build technical skills, stay current with industry practices, and demonstrate a strong commitment to continuous learning and professional growth.
